

## Ecosse Proud new product of Audio Dream Where Emotionally Stirring Sound Begins

Now introducing CES, the worlds largest electronics show in the world where all industry affiliates are eligible to attend and we at Audio Dream Distributions' were lucky enough to be able to attend. Here we saw things from the world's largest LCD screen boasted by Panasonic, to the worlds smallest organic transistors used in some of Intel's microchips. Here, the worlds largest manufacturers will come and display their current products, and anything that will be potentially hitting the markets in the future, manufacturers such as Sony, Toshiba, and Hitachi. We also caught a glimpse of some smaller ambitious entrepreneurs displaying their products in hope of success.

Among all of the wonders that we saw at CES, we were able to see some of the world's most exotic high end audio systems. It was pretty much an audiophile's wet dream. What better way for industry affiliates to search out that next pair of speakers, CD player, or that interconnect..

## HD DVD Vs Blu-Ray

### The battle has come to an end

Sony has come far from their beta vs. vhs defeat some 30years ago. After announcement of Toshiba to discontinue production of HD DVD players Sony's Blu-Ray becomes the standard for 1080p DVD reproduction. Toshiba, as a good will gesture has offered customers of HD DVD a \$50 credit at their respective store of purchase for their support of the discontinued format. Having owned major movie production companies definitely came in handy for Sony this time around. But watch out there's a new player in town a London based company is launching HD VMD within five weeks on Amazon hoping to shake media giant Sony. This new format appears to be very cost efficient. Here we go again.

### A little Info on buying Blu-Ray

If you were one who waited to see who would win the HD player war and are in the market now for a Blu-Ray then these are our picks.

First we start with Sony's BDPS300 this base model offers a 1080p video output along with Dolby Digital and DTS outputs and 24p True Cinema output and cinema-tuned picture presets. The player can upscale your regular DVD's to 1080p so you don't have to worry about what to do with your collection. This unit uses a 192 KHz/24bit Audio D/A Converter. This unit retails for 499.99.

The BDPS500 Model Sony Blu-Ray offers all features of the BDPS300 and more for its price of \$699.99. This model allows DTS bit stream out through HDMI 1.3 and it is Blu-ray writable play back ready and offers Dolby's new True HD decoding. Built with rigid beam construction and a motorized sliding front panel this player is at the leading edge of Blu-Ray reproduction providing exceptional video to even the choosiest of customers.

The BDPS2000ES is the top of the line Blu-Ray player made by Sony and is part of the higher end ES home theatre series. This unit has all the bells and whistles of the BDPS500 and beyond. This unit provides separate boards for audio and video making the picture and sound that much better. Also this unit uses a Dual-shield construction that reduces the amount of dust collected on the drive. The quality construction also employs solid beam chassis that contributes to minimized vibration and drastically improvement in play back. What's more even the aesthetically pleasing feet have a purpose they help isolate the player from external vibrations. Last but not least this unit is provided with a 3 years manufacturers warranty one of the longest seen in the industry. This unit retails at 1499.99. The Samsung BDP1400 is one the best units out there for price. Retailing at 499.99 this unit provides 1080p reproduction, Dolby True HD, DTS bit stream through HDMI, Blu-Ray writable playback and upscale regular DVDS to 1080p. This unit has by far the most features for its price.

## New Review Highlights

Excellent  
review and  
featured on  
the cover of  
UHF 82

The experience deepened our respect for what is an amazing tweeter..." "the range of frequencies was pretty much seamless." "there's a freshness to the sound," said Albert, adding, "that's the word I've been searching for, freshness."

**Gerard says:** "Homogeneous though these speakers are, it is the top end performance that really sets them apart from a lot of lesser speakers. And did you know that the same tweeter is used on the entire ACT range?"

**Reine says:** "Don't just applaud because I'm putting them on the top step of the podium. Go further, and make room for them at home."

**Albert:** "They are, without a doubt, reference quality."
